

# ECOCARD

## CM 22

Highly flexible adhesive mortar for large format tiles

### PROPERTIES:

- For large gres tiles, (above 1 m<sup>2</sup>) and natural stone (colour-fast) for indoor and outdoor use
- Adjustable consistency and an increased retention of water
- Thick-bed application up to 20 mm
- Highest adhesion strength and flexibility (S1 class)
- For critical substrates like on balconies, terraces and on heated floors,
- For use in pools and potable water tanks
- Slip resistance

## SUSTAINABLE BUILDING

### LEED DATA SHEET

#### LEED v4 certification - verification of product requirements

Category:	Credit:	Impact:
Integrative process		Not applicable to this product
Location and Transportation		Not applicable to this product
Sustainable Sites		Not applicable to this product
Water efficiency		Not applicable to this product
Energy and Atmosphere		Not applicable to this product
Materials and Resources		
	MR Credit Building Product Disclosure and Optimization-Environmental Product Declarations	EPD declaration – ask producer
	MR Credit Building Product Disclosure and Optimization—Sourcing of Raw Materials	Positive conditionally - see the location and place where raw materials are obtained.
Indoor Environmental Quality		
	EQ Credit Low-Emitting Materials	Positive – EC 1PLUS
Installation		Not applicable to this product
Regional Priority		Not applicable to this product

## BREEAM DATA SHEET

BREEAM International New Construction 2016 certification - verification of product requirements		
Category:	Credit:	Impact:
Management		Not applicable to this product
Health and wellbeing		Not applicable to this product
	Hea 02 Indoor air quality	Positive – EC 1PLUS
Energy		Not applicable to this product
Transport		Not applicable to this product
Water		Not applicable to this product
Materials		
	Mat 01 Life cycle impacts	EPD declaration – ask producer
	Mat 03 Responsible sourcing of construction products	Positive – ISO14001 and the supply chain (conditionally)
Waste		Not applicable to this product
Land use and ecology		Not applicable to this product
Pollution		Not applicable to this product
Innovation		Positive

**LEED (Leadership in Energy and Environmental Design)** is the most widely used green building rating system in the world established by U.S. GreenBuilding Council in 1998. Certification is carried out in 120 countries and covers all types of buildings - from commercial to residential. LEED certification is a globally recognized symbol of sustainability achievement and leadership.

The categories assessed during the certification of the building with the LEED multi-criteria assessment system are:

- Location and transport (LT)
- Sustainable sites (SS)
- Water efficiency (WE)
- Energy and atmosphere (EA)
- Materials and resource (MR)
- Indoor environmental Quality (EQ)
- Innovation (IN)
- Regional priority (RP)

**BREEAM (BRE Environmental Assessment Method)** is currently one of the most widely used methods of assessing buildings in terms of their environmental performance in Europe. It was established in 1990 by the BRE (Building Research Establishment) organization.

The categories assessed during the certification of the building with the BREEAM multi-criteria assessment system are:

- Transport (Tra)
- Management (Man)
- Health and wellbeing (Hea)
- Energy (Ene)
- Land use and ecology (LE)
- Materials (Mat)
- Water (Wat)
- Waste (Wst)
- Pollution (Pol)
- Innovation (In)

Manufacturing

Henkel Operation Poland  
Stara Góra 24, 26-220 Stąporków;

As required by **LEED** points by the use of regional products can be obtained when at least 10% of the total cost of the materials used in the design are the materials in the region, which is obtained, produced or recovered in a radius of 500 miles (approx. 804 km) from the construction. It is possible to obtain: 1 point - 10% and 2 points - 20%.

The LEED v4 points can be multiplied x2 if local materials are sourced, manufactured or extracted within 100 miles (160 km).

## ENVIRONMENTAL POLICY

We declare to conduct activities aimed at environmental protection, in particular, conducting technological processes, technical works, sewage treatment, waste management, environmental monitoring, preventive activities, in accordance with technical standards and legal regulations, at the highest possible technical level available to the Company. We are committed to continuously reducing our environmental impact.

## SUSTAINABILITY - OTHER INFORMATION

### LIST OF QUALIFIED SUPPLIERS

The producer has a qualified list of suppliers.

### RESPONSIBLE RECOVERY OF RAW MATERIALS

The producer acquires raw materials in a sustainable and responsible manner.

### COMPANY CERTIFICATES AND STANDARDS

- ISO 9001:2015
- ISO 14001:2004
- ISO 45001

## ECOSQUAD

Product card with the requirements of multi-criteria certification LEED, BREEAM and other ecological certificates.
