

# ECOCARD

## CL 51

Fast drying, flexible, dispersion based waterproofing film

### PROPERTIES:

- Admitted for use on wall and floor
- Not subject to rising damp or permanent water immersion
- Water immersion
- Waterproof
- Suitable for brushing, rolling and spreading
- Crack-bridging
- For indoor use

## SUSTAINABLE BUILDING

### LEED DATA SHEET

| LEED v4 certification - verification of product requirements |  |  |
|--|--|--|
| Category:  | Credit:  | Impact:  |
| Integrative process  |  | Not applicable to this product   |
| Location and Transportation                                  |  | Not applicable to this product   |
| Sustainable Sites  |  | Not applicable to this product   |
| Water efficiency   |  | Not applicable to this product   |
| Energy and Atmosphere  |  | Not applicable to this product   |
| Materials and Resources                                      |  |  |
|  | MR Credit Building Product Disclosure and Optimization- Environmental Product Declarations | <b>EPD declaration – ask producer</b>  |
|  | MR Credit Building Product Disclosure and Optimization— Sourcing of Raw Materials          | <b>Positive conditionally - see the location and place where raw materials are obtained.</b> |
| Indoor Environmental Quality                                 |  |  |
|  | EQ Credit Low-Emitting Materials   | <b>Positive – EC 1PLUS</b>   |
| Installation   |  | Not applicable to this product   |
| Regional Priority  |  | Not applicable to this product   |

## BREEAM DATA SHEET

| BREEAM International New Construction 2016 certification - verification of product requirements |  |  |
|---|--|--|
| Category:   | Credit:  | Impact:  |
| Management  |  | Not applicable to this product                           |
| Health and wellbeing  |  | Not applicable to this product                           |

| Materials   |  |  |
|   | Mat 01 Life cycle impacts                            | EPD declaration – ask producer                           |
|   | Mat 03 Responsible sourcing of construction products | Positive – ISO14001 and the supply chain (conditionally) |
| Waste   |  | Not applicable to this product                           |
| Land use and ecology  |  | Not applicable to this product                           |
| Pollution   |  | Not applicable to this product                           |
| Innovation  |  | Positive   |

**LEED (Leadership in Energy and Environmental Design)** is the most widely used green building rating system in the world established by U.S. GreenBuilding Council in 1998. Certification is carried out in 120 countries and covers all types of buildings - from commercial to residential. LEED certification is a globally recognized symbol of sustainability achievement and leadership.

The categories assessed during the certification of the building with the LEED multi-criteria assessment system are:

- Location and transport (LT)
- Sustainable sites (SS)
- Water efficiency (WE)
- Energy and atmosphere (EA)
- Materials and resource (MR)
- Indoor environmental Quality (EQ)
- Innovation (IN)
- Regional priority (RP)

**BREEAM (BRE Environmental Assessment Method)** is currently one of the most widely used methods of assessing buildings in terms of their environmental performance in Europe. It was established in 1990 by the BRE (Building Research Establishment) organization.

The categories assessed during the certification of the building with the BREEAM multi-criteria assessment system are:

- Transport (Tra)
- Management (Man)
- Health and wellbeing (Hea)
- Energy (Ene)
- Land use and ecology (LE)
- Materials (Mat)
- Water (Wat)
- Waste (Wst)
- Pollution (Pol)
- Innovation (In)

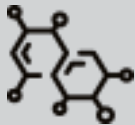

## Manufacturing

Henkel Operation Poland  
Stara Góra 24, 26-220 Staporkow  
Poland

As required by **LEED** points by the use of regional products can be obtained when at least 10% of the total cost of the materials used in the design are the materials in the region, which is obtained, produced or recovered in a radius of 500 miles (approx. 804 km) from the construction. It is possible to obtain: 1 point - 10% and 2 points - 20%.

The LEED v4 points can be multiplied x2 if local materials are sourced, manufactured or extracted within 100 miles (160 km).

## ENVIRONMENTAL POLICY

We declare to conduct activities aimed at environmental protection, in particular, conducting technological processes, technical works, sewage treatment, waste management, environmental monitoring, preventive activities, in accordance with technical standards and legal regulations, at the highest possible technical level available to the Company. We are committed to continuously reducing our environmental impact.

## SUSTAINABILITY - OTHER INFORMATION

**LIST OF QUALIFIED SUPPLIERS**

The producer has a qualified list of suppliers.

**RESPONSIBLE RECOVERY OF RAW MATERIALS**

The producer acquires raw materials in a sustainable and responsible manner.

**COMPANY CERTIFICATES AND STANDARDS**

- ISO 9001:2015
- ISO 14001:2004
- ISO 45001
