

## BONDERITE® M-CR 1132 M AERO Pen

The Henkel BONDERITE® M-CR 1132 M AERO Pen\* is a miniature version of the BONDERITE® M-CR 1132 AERO Touch-N-Prep® AERO pen. This smaller format is ideal for coating the inside of fastener holes and harder to reach areas.

Designed to save labor, materials, and time, this product provides a dry-in-place chromate conversion coating for touch-up applications, offering the same ease and safety as the traditional Touch-N-Prep® AERO pen.

### Benefits:

- Smaller size pen with standard two-sided tip (round/or pointed) for smaller surface area applications.
- An optional slim tip is available for purchase to improve penetration/reach in 3/16" fastener holes.
- Reduces worker contact to chromating solutions and waste, such as rinse water generated from other chromating processes

\*Before starting the application procedure, it is necessary to become familiar with the mechanics of the pen itself.

BONDERITE® M-CR 1132 M AERO with standard tip

BONDERITE® M-CR 1132 M AERO with optional slim tip inserted. (pen sold separately)
