Product Description Sheet 50 ml S-style Dual Cartridge Pneumatic Applicator

Part # 1493310
North American Engineering Center May 2011

PRODUCT DESCRIPTION

The Loctite® 50 ml Dual Cartridge Pneumatic Applicator is a hand-held pneumatically operated dispenser. It provides a convenient and cost effective method for applying two-part adhesive products consistently with minimal effort and waste. The applicator accepts the 50 ml S-style dual cartridges with a 10:1 mix ratio. It is designed to dispense at any angle without leaks and eliminates waste. The "S" cartridge design incorporates a stronger attachment flange and separate cylinders to allow for higher dispensing pressures. An interface with separated outlets between cartridge and static mix nozzle eliminates the possibility of cross contamination and avoids plugged cartridges.

PRODUCT FEATURES

- Adjustable air regulator to 50 psi (3.5 bar) maximum.
- Instant dump valve for quick air release.
- Accepts 50 ml dual 10:1 mix ratio S-style adhesive cartridges.
- Allows user to control amount and positioning of the adhesive.

Technical Data

- Size: 9" (H) x 9.5" (L) x 2.75" (D)
- Weight: 730 grams

Items Included:

- Pneumatic Applicator
- ¼ - 19 BSPP x ¼ -18 male NPT adapter fitting
- Operating Manual

Loctite® Brand Accessories and Spare Parts (not included):

- Static Mix Nozzle for 50 ml S-style 10:1 mix ratio adhesives; P/N 1034575 (10 pk.)
