

CONSUMER GOODS COMPANY ENHANCES ASSEMBLY PROCESS THANKS TO LOCTITE®

LOCTITE® Dual Integrated Dispenser Equipment

Situation:

A Consumer Goods company had difficulty bonding caps to dispenser bottles that were being used in hotel bathrooms. A locking mechanism was used previously but did not lock permanently. They needed a solution that was repeatable and increased throughput due to mass production of the bottles.

LOCTITE Solution:

The LOCTITE® Technical Sales Engineer reviewed the requirements and recommended using LOCTITE® 411™ Instant Adhesive with the LOCTITE® VA 40 Valve on a Dual Channel Integrated Dispenser Reservoir. Using the instant adhesive with the integrated reservoir allows for a consistent application and precise drop size, increasing the throughput and overall assembly reliability.

Benefits:

Incorporating LOCTITE® 411™ and the reservoir system to the assembly process was a success. Both LOCTITE® solutions together met application processing needs. The customer was able to increase production while securely bonding the dispensers together permanently. Working with LOCTITE® provided a valuable solution to this customer's automated assembly process, improving their overall reliability and productivity.

Product	Size	IDH
LOCTITE® 411™	20 g	135446
	1 lb.	135447
LOCTITE® VA40 CA	N/A	2333708
LOCTITE® Dual Channel Integrated Dispenser	N/A	1390321
