TEROSON®

UTILITY VEHICLE SEALANT PROBLEMS SOLVED WITH LOCTITE® TECHNOLOGY

SITUATION

A recreational vehicle company had difficulties sealing panels on utility trailers. They had two problems with their moisture cure urethane seam sealant. It was slow curing which limited production throughput. It occasionally failed in service which created warranty expenses and affected the company's brand reputation.

LOCTITE SOLUTION

The LOCTITE® Specialist analyzed the customer's situation and recommended TEROSON® SB 450 and MS 930NA™. TEROSON® SB 450 cleans and improves the adhesion of elastic adhesives and sealants on metals, plastics and coated surfaces. TEROSON® MS 930NA™ is a flexible modified silane polymer adhesive. It has many manufacturing-friendly features - sag resistant, high initial tack, available in a variety of colors and packages and is free of solvents, silicone and isocyanates.

BENEFIT

TEROSON® SB 450 and MS 930NA™ delivered a total solution. The faster cure increased manufacturing throughput. The isocyanate-free sealant improved employee health and safety. The improved sealant adhesion and durability eliminated most water ingress warranty claims. LOCTITE® technology increased the company's throughput and overall reliability.

Product	Size	IDH
TEROSON® MS 930NA™	570 ml	2138428
