

PAINT & DECALS QUICKLY REMOVED IN ONE-STEP WITH LOCTITE®

SITUATION

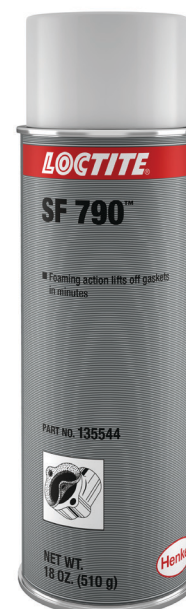

A company needed to re-brand a fleet of acquired delivery vehicles. They needed a product to strip off paint and decals that was fast, portable and controllable. The methods they were using previously were proving to be unsuccessful.

LOCTITE SOLUTION

A LOCTITE® Specialist recommended LOCTITE® SF 790™ to remove the labels and paint. It is very effective because the aerosol can contains methylene chloride, a powerful stripping agent, and a foaming agent. The foaming agent holds the spray in place to penetrate and dissolve the paint and decals. LOCTITE® SF 790™ was sprayed directly onto the decals and allowed to foam for 10 minutes. The paint and decals were scraped off in one step and the surface wiped clean, ready for new paint and company logo decals.

BENEFIT

LOCTITE® SF 790™ was the right product for this project. The aerosol package was portable. The foaming spray was controllable. The product formula was effective – paint and decals were removed in minutes with just one application. The fleet of acquired delivery vehicles was quickly re-branded and on the road generating revenue and displaying the company brand.

Product	Size	IDH
LOCTITE® SF 790™	18 oz	135544
