

# ▶ BONDERITE C-MC 3000

## ALKALINE MAINTENANCE CLEANER/DEGREASER

### Application

- Multi application methods: High pressure, manual immersion ....
- Multi application areas: Vehicle cleaning (cars, trucks, trains, tarpaulin) / insect removal / manual bogie cleaning / heavy soiled floors / pits / bricks and stones / machines / containers / cisterns / ...

### Substrates

All alkali resistant substrates

### Benefits

- Very high concentrated (surfactants) cleaner = economic in use
- High cleaning-degreasing efficiency, even at room temperature
- Can be used on all alkali resistant substrates: steel, stainless steel, copper, brass, glass, painted surface...
- Well foaming – not disturbing
- Nicely perfumed

### Safety

- Phosphate, EDTA and NTA free
- VOC free

### Extra

- Homologations: SNCF – NMBS – CFL
- Buying customers: SNCF – NMBS
- Recommend the use of BONDERITE C-MC 3000 after graffiti removal

T°	pH	Concentration
20 – 80°C	12,8 (100%)	1 – 20 % depending on application and soil
Composition		
Nonionic and anionic surfactant Perfume NaOH

ISOLATOR

**GIPRO - Insulator cleaning**

GIPRO tested several agents for easy and thorough cleaning of epoxy insulators.

To save the insulator's epoxy surface a basic cleaner is recommended by leading epoxy manufacturers.

**The cleaner with the best results was  
BONDERITE C-MC 3000 which was developed  
for cleaning rail vehicles**
