Quality for Professionals

CN 69 – The universal levelling champion from Ceresit

Fast – Thanks to ideal flow properties, CN 69 is easy to apply and ensures rapid work progress. Because of its self-smoothing effect, the material readily spreads across the surface without visible tool marks. The floor is quickly ready to receive floor coverings.

Strong – By having optimal compressive strength, the levelling compound offers excellent durability after hardening. It produces crack- and shrinkage-free surfaces that are even suitable for underfloor heating. CN 69 ensures a long service life for the entire floor construction.

Tough – Due to its special formulation, CN 69 ensures easy application on a great variety of substrates with different requirements. In addition, it also has a strengthening effect on the substrate.

One technology – many benefits

Optimal durability

- Optimal compressive strength
- Crack- and shrinkage-free
- Reliable performance over the entire life cycle

Optimal flowability

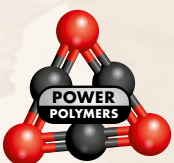

- Easy application and fast work progress
- Self-smoothing, no tool marks
- Smooth, homogeneous surface

Fast application

- No grinding step required
- Easy mixing; no remixing necessary
- For large areas and fast progress on site

PowerPolymers – for perfect results

A state-of-the-art polymeric binder was combined with different active ingredients, thus achieving fast application, optimal flowability and durability. The unique combination of ingredients ensures perfectly smooth surfaces and long-term reliable results. PowerPolymers – the easy way to a perfect substrate.
