

Polybit

CM 17 - SUPER FLEXIBLE Tile Adhesive Visible Fibers For Strength And Flexibility

- High performance - easy to apply
- High bond strength - recommended for large tile formats
- Suitable for applications on difficult substrates - including tile over tile

Henkel

Quality for Professionals

When the bond is strong, you can do anything.

Polybit CM 17

Super Flexible Tile Adhesive for critical indoor and outdoor applications, substrates and large tile formats.

This polymer-modified, fibres enhanced adhesive ensures a safe and long-lasting application for tiles of any size and type including ceramic, cement and stone tiles - providing a super flexible barrier and preventing stress development on difficult substrates.

Polybit CM17 SUPER FLEXIBLE tile adhesive, with its high-performance, provides a reliable and trouble-free tiling application.

Benefits of Fibre-Force

During the application, Polybit CM17 SUPER FLEXIBLE Tile adhesive, forms a fibre reinforced film of binder and polymer particles, which ensures a strong and durable bond with the tile.

The fibres improve the impact and abrasion resistance, increase workability and enhance mechanical properties, preventing the adhesive from losing its stability, flexibility and strength over time.

Polybit CM 17 SUPER FLEXIBLE Tile adhesive, enhanced with the Fibre Force technology, eliminates the most common cases of tiling application failure – cracks, detachment or deformation of tiles ensuring superior long-lasting results.

Fibre-Force technology vs. Standard tile adhesives:

The fibres shown in red on the right side are a theoretical representation of the reinforced zone that is created. In practical applications, the fibres will be positioned randomly and not in a structured mesh.

Standard tile adhesive

Polybit CM 17 SUPER FLEXIBLE tile adhesive with Fibre Force

Key Benefits

Superior performance and flexibility

Suitable for natural stone applications

Safe application for large tiles

User friendly - easy to apply

Fields of Application Indoor and Outdoor

Commercial swimming pools

High traffic areas industrial & commercial

Balconies & facades

Gypsum & plasterboards
