

Polybit

Strong UV protection for Polyurethane foam roof applications

- Low VOC
- Strong bonding
- High solar reflectance

Henkel

Quality for Professionals

Polycryl PF - Strong UV protection for Polyurethane foam roof applications

Polycryl PF is a single component, acrylic waterproofing and protective coating especially designed for Polyurethane foam on roof applications. Polycryl PF upon curing forms a tough, flexible and durable coating which is resistant to UV and other weathering agents, due to these factors the coat will be perfect bonded to Polyurethane foam surface, representing the safest option for both permanent and temporary exposed roofs.

Key Benefits

- Breathable
- Excellent UV resistant
- High solar reflectance
- Excellent resistance to water and moisture
- Environmentally friendly. Low VOC (<10 g/L)
- Excellent adhesion on Polyurethane foam and most porous substrates

Advantages

Technical Details

Packaging	Unit/pallet	Shelf Life	Coverage	Colour	Protection	Water flood test
25kg pail	36	12 months	3.0 m ² /L @ 200 μ DFT	White	UV resistance @ 1000 Hrs	Pass
Solid content	Tensile strength	VOC	Adhesion to polyurethane foam	Density	Elongation	
60 ±2	≥3 Mpa	<10 g/L	≥ 0.5 N/mm ²	1.35 ±0.05 g/cc	≥100%	

Application Steps
