

CASE STUDY

FOOD & BEVERAGE: SEALED WITH PEACE OF MIND

What happens when your current thread-tape seal solution results in a reprimand?

It made this food and beverage manufacturer look for an alternative.

A BETTER WAY TO SEAL THREADS

A food manufacturing customer used thread tape to seal its stainless-steel pipe fittings, but quickly began the search for a replacement when hanging tape resulted in a less than satisfactory report.

The tape also resulted in frequent leaks and posed contamination risks during the tightening process as it sometimes shreds, entering the system.

SEALED, SAFE AND SECURE

Henkel Adhesive Technologies' Loctite team recommended LOCTITE thread sealant.

This met the customer's needs in every way – complying with food processing quality standards while helping to prevent leak-causing vibrations, shock loads, or galling.

Benefits

- ✓ Ideal for stainless steel fittings
- ✓ Prevents leaks
- ✓ Compliant with food processing quality standards
- ✓ Does not contaminate
