Assembly Solutions

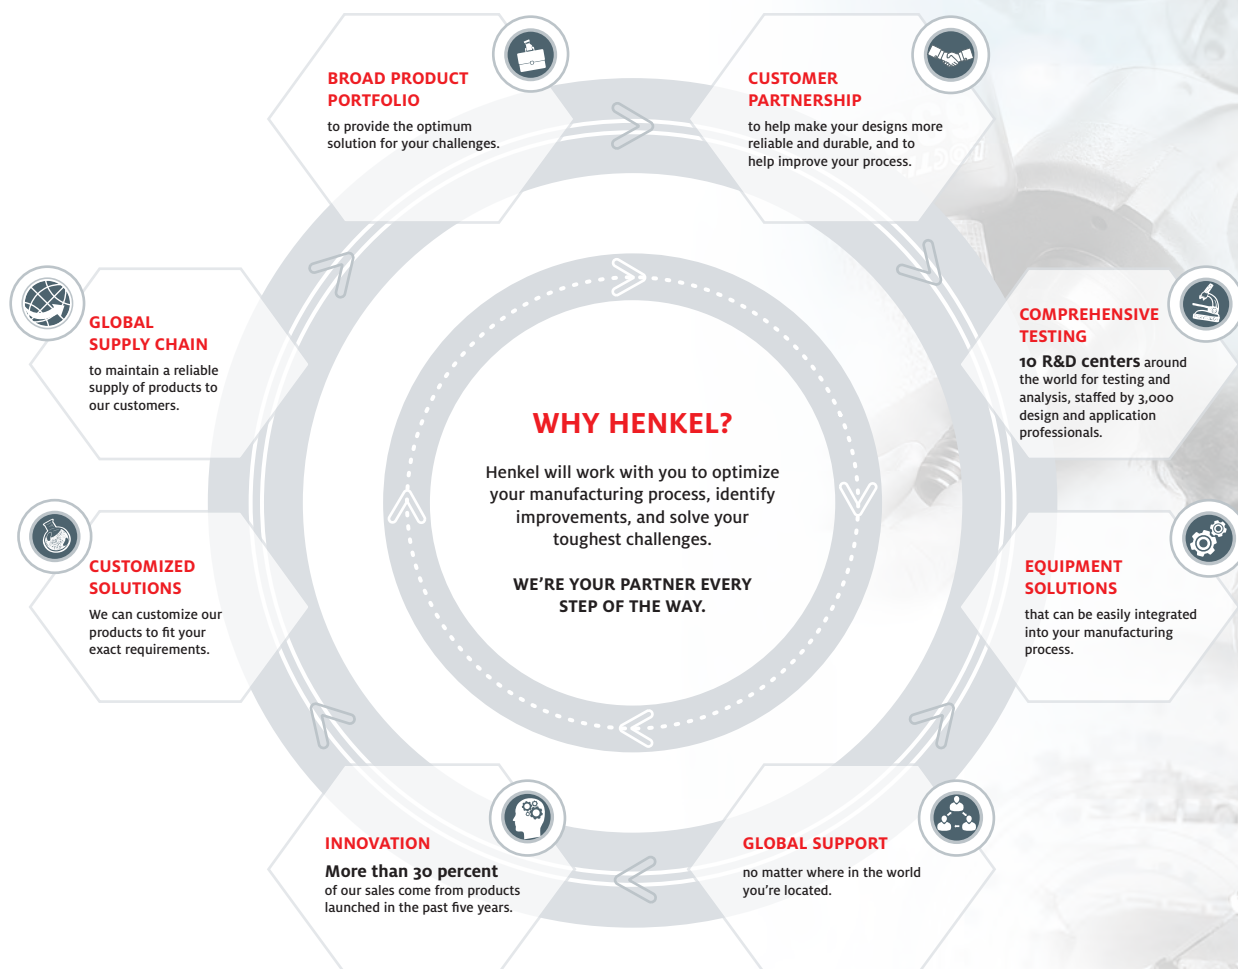

Henkel

Henkel.

Improving your designs, understanding your challenges

PROVEN SOLUTIONS FOR ALL YOUR NEEDS -
TODAY AND TOMORROW

Manufacturers face daily challenges to reduce costs, improve efficiency, and increase innovation, to name just a few. You need a supplier with a broad product portfolio, a global footprint, and the engineering and application know-how to solve your challenges. You also need a partner who can help you maintain your high quality while developing advanced new products.

Henkel, the leading solutions provider for adhesives, sealants and functional coatings worldwide, offers much more than quality adhesives. With our history and experience in the industry, our experts can help you find ways to optimize your manufacturing processes and drive down costs. We can help you reduce weight, increase durability and enhance the reliability of your equipment. And we're continually developing innovations to help you succeed in the future.

Let us show you the value Henkel offers.

TABLE OF CONTENTS

THREADLOCKING

Prevent fastener loosening and seizure

4

THREAD SEALING

Prevent leaks – air, hydraulic pipe joints

6

GASKETING

Prevent flange leaks – oil, transmission, coolant

8

RETAINING

Prevent backlash – keyway wallow, spun bearings, shaft misalignment, wear, corrosion

10

INSTANT BONDING

Bond dissimilar parts quickly and easily

12

STRUCTURAL BONDING

Bond structural assemblies and repair damaged parts

14

FLEXIBLE BONDING AND SEALING

Bond and seal parts that experience movement

16

ANTI-SEIZE LUBRICANTS

Prevent rust, corrosion, galling or seizing on metal parts in extreme environments

18

CLEANING

Clean and degrease parts and work surfaces

20

MOULD RELEASE AGENTS

Release rubber and composites with ease while molding

22

LIGHT CURE ADHESIVES

Bond parts quickly using UV / visible light

23

LOCTITE® EQUIPMENT SOLUTIONS

Dispensing systems and consumables

24

LOCTITE® PRE-APPLIED SOLUTIONS

Precoated dry-to-touch assembly solutions

25

NEW PRODUCTS

26

SOLUTIONS TO COMMON ASSEMBLY CHALLENGES

28

PRODUCT ORDERING INFORMATION

THREADLOCKING

Locking of threaded fasteners

- » PREVENTS LOOSENING FROM SHOCK AND VIBRATION
- » SINGLE COMPONENT – CLEAN AND EASY TO APPLY
- » CAN BE USED ON VARIOUS SIZES OF FASTENERS – REDUCES INVENTORY COSTS
- » FILLS GAP BETWEEN THREADS AND UNITIZES THE ASSEMBLY
- » STOPS RUST AND CORROSION

▶ ARE THE PARTS ALREADY ASSEMBLED?

Helpful Hints:

- Clean parts with LOCTITE® SF 7070 ODC-Free Cleaner and Degreaser before applying the adhesive.
- If the threadlocker will be applied below 5°C, pre-treat with LOCTITE® 7649 Primer N.
- If the parts were in contact with aqueous washing solutions or cutting fluids that leave a protective layer on the surface, wash with hot water before use.

YES

Wicking – Green

▶ HENKEL SOLUTIONS

LOCTITE® 290

Fastener Size	1/16" TO 1/2" (M2 TO M12)
Strength	High
Cure Time (Fixture/Full Strength)*	20 min./24 hr.
Breakaway/Prevail Torque (N.m)	10/29
Temperature Resistance for Continuous Service	150°C

Package Size & IDH

50 ml bottle - 531724
250 ml bottle - 848069

* Typical value @ 22°C

ADDITIONAL PRODUCTS

Name	Strength/Color	Breakaway/Prevail Torque (N.m)	Features
LOCTITE® 220	Low - Blue	9/19	Removable grade, wicking, for small threads of 1/4" (M6) or smaller
LOCTITE® 270	High - Red	26/36	Fasteners up to 3/4" (M20)
LOCTITE® 271	High - Red	28/31	Fasteners up to 1" (Up to M25)
LOCTITE® 272	High - Orange	22/24	High Temp up to 11/2" (M36)

Recommended for locking pre-assembled fasteners, i.e. instrumentation screws, electrical connectors, and set screws. Also seals porosities in welds and metal parts.

LOCTITE® PRIMERS

Use LOCTITE® Primer to:

1. Activate inactive surfaces.
2. Speed cure times for faster return to service.
3. Speed curing through larger gaps and deep threads.
4. Substantially speed cure times on cold parts.
5. Act as a cleaning agent.

Recommended for low strength threadlocking of adjustment screws, countersunk head screws, and set screws; on collars, pulleys, tool holders, and controllers. Also for low strength metals such as aluminum or brass.	With improved oil tolerance, LOCTITE® 243 Threadlocker is effective on all types of metal threaded fasteners. Prevents loosening on vibrating parts such as pump, motor mounting bolts, gear boxes, or presses. Removable with hand tools.	Engineered to cure consistently on a variety of metals, despite minor surface contaminants. Works on steel, stainless steel and most plated fasteners. Tolerates thread lubrication, anti-corrosion and protection fluids. Heat required for removal.	High strength adhesive for locking and sealing large bolts and studs 1" (25 mm) or larger in diameter. Heat may be required to weaken bond before parts can be disassembled.

Name	Color	Viscosity	Base	On-Part Life	Dry Time	Package Size & IDH	Primer is optional with: Active surfaces: Brass, copper, bronze, iron, soft steel, nickel. Primer is required with: Inactive surfaces: Aluminum, stainless steel, magnesium, zinc, black oxide, cadmium, titanium, and others.
7649 Primer N	Clear/Green	2	Acetone	30 days	30 to 70 seconds	100 ml - 849297	
7471 Primer T	Amber	2	Acetone/ Isopropanol	7 days	30 to 70 seconds	100 ml - 849296	

THREAD SEALING

- » LIQUIDS ENSURE COMPLETE CONTACT BETWEEN THREADS FOR A 100% SEAL
- » LIQUIDS WILL NOT CREEP, SHRINK, SHRED OR BLOCK SYSTEMS (INCLUDING FILTERS)
- » DISASSEMBLY CAN BE ACHIEVED EASILY WITH BASIC HAND TOOLS
- » REPLACES TAPES AND PASTES

► ARE THE PARTS METAL OR PLASTIC?

Helpful Hints:

- If the sealant (LOCTITE® 545 Thread Sealant, LOCTITE® 565 Thread Sealant, LOCTITE® 567 Thread Sealant, or LOCTITE® 561 Pipe Sealant) will be applied below 5°C, pre-treat with LOCTITE® 7649 Primer N.
- All parts must be clean and dry before sealing - use LOCTITE® SF 7070 ODC-Free Cleaner and Degreaser.

**PLASTIC AND/
OR METAL**

HENKEL SOLUTIONS	Cord LOCTITE® 55
Description	Cord
Maximum Thread Size	4" (10.16 cm)
Temperature Resistance	150°C
Maximum Pressure Resistance (N/mm ²)/Cure Time	10,000 psi (68.9)/instant
Substrate to be Sealed	Metal, Plastic or Both
Instant Low Pressure Seal	Yes
Package Size & IDH	150 metres - 1752446

ADDITIONAL PRODUCTS

Name	Features
LOCTITE® 572	Easy application by hand. Slow curing. For use on construction pipe sealing.
LOCTITE® 545	Low strength, fast curing for hydraulic / Pneumatic fittings.

Can be safely applied on metal and plastic threaded fittings.
Potable water: NSF/ANSI 61 UL Listed and Certified to CSA International. **

250 ml bottle tube - 2121367

Recommended for fine threaded fittings as used in hydraulic and pneumatic installations and small fittings in general. Carries German DVGW approval (NG-5146 AR 0855) Meets BS 6956 type A for sealing gas fittings. **

A general-purpose instant sealant for tapered and straight/tapered fittings.

Withstands temperatures to 204°C with excellent solvent resistance. Locks and seals tapered pipe threads and fittings, including high pressure applications. Disassembles with hand tools.

Medium strength, general purpose sealant for use on coarse, threaded components.

** All approvals are region specific. Please contact your Henkel Sales Representative for further information.

GASKETING

Sealing and Flanges

- » NO SHIMMING EFFECT – CONTROLLED TOLERANCES, NO NEED FOR RE-TORQUING
- » FILL ALL VOIDS – REDUCE THE NEED FOR A FINE SURFACE FINISH OF FLANGES
- » PARTS CAN BE DISASSEMBLED EASILY EVEN AFTER EXTENDED SERVICE
- » RESISTS HIGH PRESSURE WHEN FULLY CURED

▶ DOES THE EXISTING GASKET NEED TO BE USED AS A SHIM?

Helpful Hints:

- If there are traces of old gasket left on the parts to be sealed, clean with LOCTITE® SF 790 Chisel Gasket Remover.
- All parts must be clean and dry before sealing – use LOCTITE® SF 7070 ODC-Free Cleaner and Degreaser.
- Anaerobic products cure between metal surfaces with the absence of air.

Recommended for sealing rigid & semi-rigid metal flanges. Fast curing. Gives instant sealing.

All types of flanges including stamped sheet metal. Designed for superior bonding properties to oil contaminated metals.

High temperature silicone sealant makes the repair of industrial furnaces, ovens, boilers, exhaust stacks, high temperature stacks, ducting and heating elements.

Superior flexibility, withstand high relative joint movement. High adhesion, gives instant seal. Low odor, Low volatility, Non-corrosive.

RETAINING Securing Cylindrical Assemblies

- » BOND NON-THREADED CYLINDRICAL METAL ASSEMBLIES
- » HIGH AND MODERATE STRENGTH PRODUCTS – CAN CARRY HIGH LOADS AND ELIMINATE FRETTING
- » FILL ALL VOIDS – PREVENT CORROSION
- » REDUCE THE NEED FOR CLOSE TOLERANCES
- » 100% CONTACT – LOAD AND STRESS ARE DISTRIBUTED EVENLY OVER THE JOINT

► IS THE ASSEMBLY BADLY WORN?

Helpful Hints:

- If the retaining compound will be applied below 5°C, pre-treat with LOCTITE® 7649 Primer N.
- All parts must be clean and dry before sealing – use LOCTITE® SF 7070 ODC-Free Cleaner and Degreaser.
- If the parts have been in contact with washing or cutting fluids containing nitrates, wash with hot water.

A controlled strength retaining compound that is ideal for cylindrical parts that require disassembly.

Recommended for parts that will need subsequent dismantling, i.e. retention of bearings onto shafts and into housings.

Maximum strength. For use where high dynamic force or cyclic loading is expected. Offers high temperature performance and oil tolerance.

Press Fit/High Strength/Rapid Cure. Offers high temperature performance and oil tolerance.

INSTANT BONDING

- » ASSEMBLE PARTS QUICKLY AND EASILY
- » REPAIR BROKEN PARTS
- » BOND DISSIMILAR PARTS

Surface insensitive gel. Bonds porous & absorbent surfaces. Non-dripping, particularly suited for overhead applications.

Particularly suited for bonding rubbers & plastics. A must for every tool box for general maintenance & repair. Makes O-rings instantly. Wicking viscosity for tight bond lines.

High viscosity adhesive offering maximum adhesion to metals. Ideal for bonding small metal parts for general maintenance.

A general purpose adhesive designed to bond rubber, metal & plastic parts.

STRUCTURAL BONDING

- » ELIMINATES OR SIGNIFICANTLY REDUCES COSTLY MECHANICAL FASTENING METHODS SUCH AS RIVETS, SCREWS AND WELDS
- » IDEAL FOR QUICK REPAIRS AND STRUCTURAL ASSEMBLIES
- » EXCELLENT RESISTANCE TO SEVERE ENVIRONMENTAL CONDITIONS
- » BONDS DISSIMILAR MATERIALS, SUCH AS METAL TO PLASTIC
- » FILLS LARGE GAPS BETWEEN PARTS

Exclusive formula suspends copper and graphite in a high quality grease. Protects metal parts from rust, corrosion, galling, and seizing at temperatures to 982°C. Tested to Mil-PRF-907E. CFIA Approved. **

Copper-free. Recommended for stainless steel and other metal fittings. For preventing corrosion, seizing, and galling in harsh, chemical environments, and temperatures to 1315°C. ABS Approved. **

Metal free. Excellent lubricity. Provides outstanding lubrication to all metal including stainless steel, aluminum and soft metals up to 1315°C.

Prevents seizure, galling, and friction in stainless steel and other metal parts up to 399°C. NSF H1 rated for incidental food contact. **

Formulated to protect assemblies exposed directly or indirectly to fresh and salt water, this anti-seize works especially well in high humidity conditions. It has excellent lubricity, superior water washout spray resistance, and prevents galvanic corrosion. ABS Approved.**

** All approvals are region specific. Please contact your Henkel Sales Representative for further information.

5litre bottle - 789065
20litre bucket - 789705

150g bottle - 1423361
425g bottle - 1423327

190z aerosol can - 1752427

Removes gaskets from any type of assembly in 10 to 15 minutes. Prepares metal parts for new gaskets, eliminating scraping and sanding. Works on wood; non-corrosive on aluminum. Not for use with plastics, Linoleum, or synthetic fibers.

Biodegradable, all-purpose, industrial strength, concentrated cleaner and degreaser. Can be economically diluted with water. Formulated for wipe down, pressure spraying, and immersion cleaning processes at room temperature or heated. Non-flammable and non-toxic. Contains no ODCs.

A non-aqueous, hydrocarbon-based solvent designed for cleaning and degreasing surfaces to be bonded with adhesives, as well as for general purpose industrial cleaning. Safe on aluminum, rubber, and most plastics, and will not cause flash rusting on water-sensitive parts. Dries residue-free. Contains no ozone-depleting compounds (ODCs).

Aggressively penetrates, dissolves, and removes oil and grease from parts. Dries quickly with no residue. Contains no ODCs.

MOULD RELEASE AGENTS

- » EASY TO APPLY, RAPID CURE
- » NO CONTAMINATING TRANSFER
- » MULTIPLE RELEASES
- » MINIMAL MOULD BUILD-UP
- » HIGH THERMAL STABILITY

LOCTITE® FREKOTE® 770-NC

LOCTITE® FREKOTE® R-120

LOCTITE® FREKOTE® R-220

Description	Quick curing	Ready to use	Highly filled elastomers
Moulding Process	Cast Compression Molding Lay-up RTM Vacuum Bagging Filament Winding	Compression Transfer	Difficult molding application, especially for high aspect ratio parts
Application Temperature	15°C - 60°C	60°C - 204°C	60°C - 205°C
Cure Time and Temperature	Cure at room temperature for 5-10 minutes	25 minutes at 60°C or 10 minutes at 93°C or 4 minutes at 150°C	25 minutes at 60°C or 10 minutes at 93°C or 4 minutes at 150°C
Package Size & IDH	1 gal drum - 416032	20 litre - 1661893	5 gal - 2007063

Versatile release agent which provides high slip where mould geometry problems are encountered. It cures rapidly at RT to give a high gloss finish to the moulded parts. It is a low odour, clear fast evaporating solution that can be used with FRP composites, epoxies, polyester resins, vinyl resins and thermoplastics.

A water-based, semi-permanent release agent for rubber molding. Capable of releasing all natural and synthetic polymers including some thermoplastic urethanes.

Offers excellent release and slip properties and is recommended for the most demanding rubber molding applications, such as EPDM rubber, and will also release thermoplastic urethanes and solid polyurethane cast elastomers.

LIGHT CURE ADHESIVES

- » CURES IN SECONDS WHEN EXPOSED TO UV / VISIBLE LIGHT SOURCES
- » SINGLE COMPONENT - EASY TO USE
- » EXCELLENT BOND STRENGTHS TO PLASTIC AND GLASS
- » DUAL CURE FORMULATIONS FOR CURING WHERE LIGHT CANNOT REACH

Elongation at break, %	300	290	7.6
Shore Hardness	D 70	D 60	D 74
Temperature Range	-54°C to 150°C	-54°C to 150°C	-54°C to 150°C
Package Size & IDH	50ml - 1751830 1 litre - 1751833	50ml - 847579 250ml - 848070	1 litre - 1752409

A medium viscosity adhesive that bonds & seals glass to glass, or glass to metal components. Electrical properties of the material makes it suitable for potting and tacking.

A high viscosity adhesive that creates a tough, flexible bond resistant to vibration and shock. Effective on a wide range of materials. Cures in minutes using an activator, UV light or both.

A low viscosity, UV cure adhesive that has excellent adhesion to glass, metal & certain thermoplastics. ISO 10993 compliant.

LOCTITE® EQUIPMENT SOLUTIONS

- » PRECISION DISPENSING
- » ELIMINATES WASTE
- » INCREASED PRODUCTIVITY DUE TO AUTOMATION

Since 1971, Henkel Corporation has designed, built and integrated high-quality equipment solutions. From simple handheld devices to fully automated systems, Henkel offers a complete line of standard off-the-shelf LOCTITE® brand dispensing and light curing equipment, which can be integrated easily into your manufacturing process.

From water-thin liquids to high-viscosity pastes, LOCTITE® brand equipment is capable of dispensing and curing a wide variety of adhesives, sealants and other industrial fluids.

In addition to our standard line of equipment, Henkel offers a number of resources to support your dispensing needs:

- Custom Equipment Systems – We can modify any LOCTITE® brand standard system or customize a system to meet your specific assembly needs.
- Equipment Website – Locate details on LOCTITE® brand standard and custom equipment, parts and accessories, and equipment services. To learn more about our equipment, visit www.equipment.loctite.com or contact your Henkel Sales Representative.
- Adhesive and Sealant Specialists – Henkel Adhesive and Sealant Specialists are available across the continent to personally assist you with new assembly challenges or to help you re-engineer an existing application for improved performance and cost savings using LOCTITE® brand products.

LOCTITE® PRE-APPLIED SOLUTIONS

» THE EFFICIENT & RELIABLE WAY TO LOCK & SEAL THREADED PARTS

Products with a pedigree

For over 50 years the LOCTITE® brand has been at the leading edge of securing threaded fasteners with adhesives. This has led LOCTITE® becoming the number one brand for sealing and locking threaded components worldwide and is widely accepted as being best method to ensure component security & reliability.

Now, threaded parts can be pre-coated with a solvent free locking medium that is dry-to-touch and will only cure on assembly ensuring clean, efficient & user friendly assembly. LOCTITE® offers a complete range of Dri-Seal®, Dri-Loc® and Anti-Seize Pre-Applied coatings, for locking and/or sealing threaded parts. This means that there is no longer a need to apply adhesives, sealants, or any other locking or sealing device during assembly.

In addition, every product in LOCTITE's Pre-Applied range of coatings is environmentally friendly.

For the Dri-Loc® and Dri-Seal® products manufacturing, application and the drying process are all water based and are free of organic solvents. They are all brightly coloured which enables easy inspection and identification of different grades.

LOCTITE® Pre-Applied Centres have fully automatic coating machines, which allow almost any size or shape, of a bolt, screw, stud, plug, nut etc. to be coated. Any pre-treated component can be reused after disassembly by applying the appropriate liquid LOCTITE® threadlocking or threadsealing product.

LOCTITE® Pre-Applied products have many benefits such as:

- Vibration resistant - resulting in equipment reliability
- Dry to touch coating - ease of handling
- Ease of automation - higher speed of assembly
- Guaranteed quality - trusted by leading automotive OEMs worldwide
- Any fastener becomes a self locking / self sealing fastener
- Reduced component costs and assembly time

When to use LOCTITE® Dri-Loc®, Dri-Seal® and Anti-Seize

Dri-Loc®

is a locking adhesive which provides excellent resistance to vibration loosening on any threaded fastener including nuts. The adhesive is activated during assembly and cures to form a tough polymer that eliminates movement between the threads and provides a total seal.

Dri-Seal® / Vibra Seal®

is used to permanently seal tapered and parallel threads. It gives excellent torque tension (lubricating) characteristics to aid assembly. It gives an instant seal and prevents leakage whilst allowing disassembly.

Anti-Seize

is a pre-applied high temperature, antigalling, thread lubricant that is dry to touch. For use on applications such as exhaust manifold bolts, and catalytic converter. Once applied, the part can be reused up to five times.

Dri-Loc®	
Name	Features
204	Highest Strength

Dri-Seal®	
Name	Features
5061	General Purpose
516	Big Thread

Anti-Seize

LOCTITE HY 4090 STRUCTURAL HYBRID ADHESIVE

Henkel's innovative technology delivers the strength of a structural adhesive with the speed of an instant adhesive

LOCTITE HY 4090 structural hybrid adhesive is an innovative hybrid technology that provides the bond strength and speed that you need to solve your design and assembly challenges. With the strength of a structural adhesive and the speed of an instant adhesive, LOCTITE HY 4090 offers both performance and versatility.

This powerful combination provides impact resistance, high strength bonding on a variety of substrates and excellent chemical resistance – making LOCTITE HY 4090 the essential adhesive solution. LOCTITE HY 4090 opens the door to new applications and new solutions.

Some of many key benefits of LOCTITE® 4090:

- Strength of a structural adhesive
- Speed of an instant adhesive
- Impact and vibration resistance
- Temperature resistance up to 150°C
- Gap filling up to 5 mm
- Suitable for a variety of substrates, including metals, most plastics and rubbers

TECHNICAL DATA	
COLOR	Slightly cloudy to light yellow
APPEARANCE	High viscosity gel
MIX RATIO (VOLUME)	1:1
WORKING TIME	3 to 5 min.

PROPERTIES OF CURED MATERIAL		
LAP SHEAR STRENGTH, ISO 4587, AFTER 24 HOURS, 22°C	Steel (grit blasted)	17 N/mm ²
	Aluminum (etched)	13 N/mm ²
	Polycarbonate	6.9 N/mm ²
HIGH GAP FILL	Up to 5 mm depending on bond geometry	
TEMPERATURE RESISTANCE	-40°C to 150°C	
CHEMICAL RESISTANCE	Very good chemical/solvent resistance

SOLUTIONS TO COMMON ASSEMBLY CHALLENGES

» LOCTITE® ENGINEERING ADHESIVES AND SEALANTS ARE DESIGNED TO OFFER YOU MORE RELIABILITY AND COST-SAVINGS OVER CONVENTIONAL ASSEMBLY METHODS.

THREADLOCKING		
Traditional Method	Problem	LOCTITE® Solution
LOCKNUTS 	<ul style="list-style-type: none"> • Double cost. • Requires extra space. • Corrodes in place. • Time consuming to assemble. 	<ul style="list-style-type: none"> • Locks single nut. • Uses standard parts. • Seals against corrosion. • Fast assembly.
SPRING WASHERS 	<ul style="list-style-type: none"> • Not an effective locking system. • Can damage contact faces. • Large inventory. 	<ul style="list-style-type: none"> • Completely vibration proof. • No damage, No corrosion. • One bottle size for all size threads.
NYLON INSERTS 	<ul style="list-style-type: none"> • On-torque needed. • Ineffective under severe vibration. • Requires good access. • Should not be re-used. 	<ul style="list-style-type: none"> • Low on-torque. • Effective on adverse conditions. • Easy to apply. • Allows parts to be re-used.
TAB WASHERS / SPLIT PINS 	<ul style="list-style-type: none"> • Difficult production use. • Expensive. • Special design required. 	<ul style="list-style-type: none"> • Apply manually or automatically. • Uses standard parts.

THREAD SEALING		
Traditional Method	Problem	LOCTITE® Solution
TAPES 	<ul style="list-style-type: none"> • Shredding clogs pipes. • Manual application only. • Elbow alignment. • Overtightening causes damage. • Poor vibration resistance. 	<ul style="list-style-type: none"> • Unused sealant flushed away. • Automation possible. • Seals/locks in any position. • Vibration proof.
PASTES 	<ul style="list-style-type: none"> • Creeping/shrinkage. • Poor chemical resistance. • Poor vibration resistance. 	<ul style="list-style-type: none"> • Sealed for life. • Resists most solvents. • Vibration proof.
'O' RINGS 	<ul style="list-style-type: none"> • Large inventory needed. • Easily damaged. • Special joint design. 	<ul style="list-style-type: none"> • Universal products. • No parts to handle. • Uses standard parts.
CONE FITTINGS 	<ul style="list-style-type: none"> • Costly machining. • Easily damaged. 	<ul style="list-style-type: none"> • Use standard parts. • Use with damaged cone fitting to ensure complete seal.

GASKETING		
Traditional Method	Problem	LOCTITE® Solution
<p>PRE-FORMED MATERIALS</p> 	<ul style="list-style-type: none"> • Relaxation. • Re-torquing. • Corrosion/fretting. • Manual application. • Large inventory. 	<ul style="list-style-type: none"> • Constant seal / no re-torquing. • Total seal. • Automation possible.
<p>'O' RINGS</p> 	<ul style="list-style-type: none"> • Manual application. • Extra machining operation. • Large inventory. 	<ul style="list-style-type: none"> • Automation possible. • Standard parts used. • No parts to handle. • Low inventory
<p>SEALING COMPOUNDS</p> 	<ul style="list-style-type: none"> • Often solvent based. • Can cause clogging. • Re-torquing. • Messy. 	<ul style="list-style-type: none"> • Solvent-free. • Unused adhesive flushed away. • No relaxation. • Accurate application.
<p>CUTTING PAPER GASKETS</p> 	<ul style="list-style-type: none"> • Time consuming. • Operator skill. • Inconsistent performance. 	<ul style="list-style-type: none"> • Little preparation. • Easy to apply. • Constant performance.

RETAINING		
Traditional Method	Problem	LOCTITE® Solution
<p>PRESS FIT</p> 	<ul style="list-style-type: none"> • High stress. • Fretting possible. • Assembly equipment required. 	<ul style="list-style-type: none"> • Load spread over joint. • Can use lighter parts. • Hand assembly possible. • Relaxed tolerances.
<p>GRUB SCREWS</p> 	<ul style="list-style-type: none"> • Poor metal to metal contact. • Low torque transmission. • Extra machining. 	<ul style="list-style-type: none"> • 100% contact. • Total surface contact creates high torque capability. • Basic machining.
<p>KEYS</p> 	<ul style="list-style-type: none"> • Prone to backlash and chattering. • Costly to produce. • Accurate machining. 	<ul style="list-style-type: none"> • No movement/fretting eliminated. • One adhesive suits many applications. • Allows relaxed tolerances.
<p>SPLINES</p> 	<ul style="list-style-type: none"> • Costly machining. • Special design • Prone to wear. 	<ul style="list-style-type: none"> • Basic machining • Normal parts. • No movement / fretting.
<p>PINS</p> 	<ul style="list-style-type: none"> • High stress concentration. • Prone to backlash. • Costly machining. 	<ul style="list-style-type: none"> • Distributed stress. • No movement / fretting. • No extra work.
