UNLOCK YOUR COST SAVING POTENTIAL

Incorporating TEROSON BOND Windscreen Adhesives into your business can help you achieve your goals to:

Reduce your costs through product- and time saving

3

Rely on a high quality product and application system

* FMVSS = Federal Motor Vehicle Safety Standard

In order to make sure we keep evolving, just as the automotive industry does, we test our products to withstand real-life crashes. Our New Henkel Crash Test Standard tests against a common urban crash scenario at higher speed: 64 km/h (40 mph), 40% overlap. But we also test against the industry standard FMVSS 212/208: 48 km/h (30 mph) and 100% head on.

On the safe side

Crash tested (Sled test simulation) at DEKRA Klettwitz according to below standards.

NEW HORIZONS. STRONG BONDS.

OUR JOURNEY STARTS HERE ...

Drivers and their passengers are your lifeline. And when they pull away after a repair, there's no such thing as too safe. And we test our products, so you don't have to.

German engineering at its best. Because good is not good enough. Together with our OEM partners we keep improving our product performance and push the crash test standards beyond the industry norm. Why? Simply because there's no such thing as too safe.

THE PARTNER AT YOUR SIDE THAT DELIVERS

- High-performance Windscreen Adhesives that meet the requirements of leading OEMs and are continuously tested with our crash test partners.
- Comprehensive marketing support and trainings for internal sales as well as for your workshop end-customers.
- Reliable, fast technical and customer service support from our manufacturing organisation, ensuring state-of the art technical and customer service.
- Products via a robust supply chain with a global footprint.

TEROSON WORKSHOP SURVEY

When working with you we **conduct a detailed survey** of your repair process and the products you use. This helps identify potential cost savings and process improvements. We use our **TEROSON Value Calculator** to make an inventory list of your current processes or, if you prefer, we jump right into a live survey at your workshop.

Through your participation in the TEROSON Workshop survey, you will receive:

A thorough audit of your repair process

A cost analysis of your process

TRAINING WITH OUR EXPERTS

Learn how we can help your team to enhance their skills through best-in-class application processes and useful hacks. Training topics (amongst others):

- Introduction to the basics of polyurethane windscreen adhesives
- Safety aspects of the windscreen
- Step-by-step replacement live demonstration
- Train the trainer concept preparing your management and sales teams to train others

Partner with us. Schedule a meeting with our experts to learn how the TEROSON BOND Windscreen Adhesive System can help your business grow.
