

Care for Your Facilities

Thousands come through your doors every day. **Help protect every one of them.**

Whether or not the people in your facilities are your patients, they are still under your care. That care begins with proper hand hygiene. It is vital to instill proper hand hygiene practices in all areas of your facilities. And you can do it with the same brands you know and trust in your own home with Dial® Professional soaps and sanitizers.

#1

Dial® is the
**#1 Doctor
Recommended
Antibacterial
Hand Soap Brand.**

Dial® Detail

Caring for patients is about much more than just providing quality healthcare. It's about helping to protect them from all things harmful, including bacteria that can cause illness. A great first step is proper hand hygiene for everyone who comes in contact with your patients.

Henkel is a global company headquartered in Dusseldorf, Germany with a North American regional center in Stamford, Connecticut. Henkel employs more than 50,000 people from 124 nationalities, and 39% of our managers are women. We are committed to leadership in sustainability as we strive to achieve a climate-neutral future and the regeneration of nature. We put our customers and consumers at the center of what we do and are committed to product quality and safety while ensuring business success with integrity.

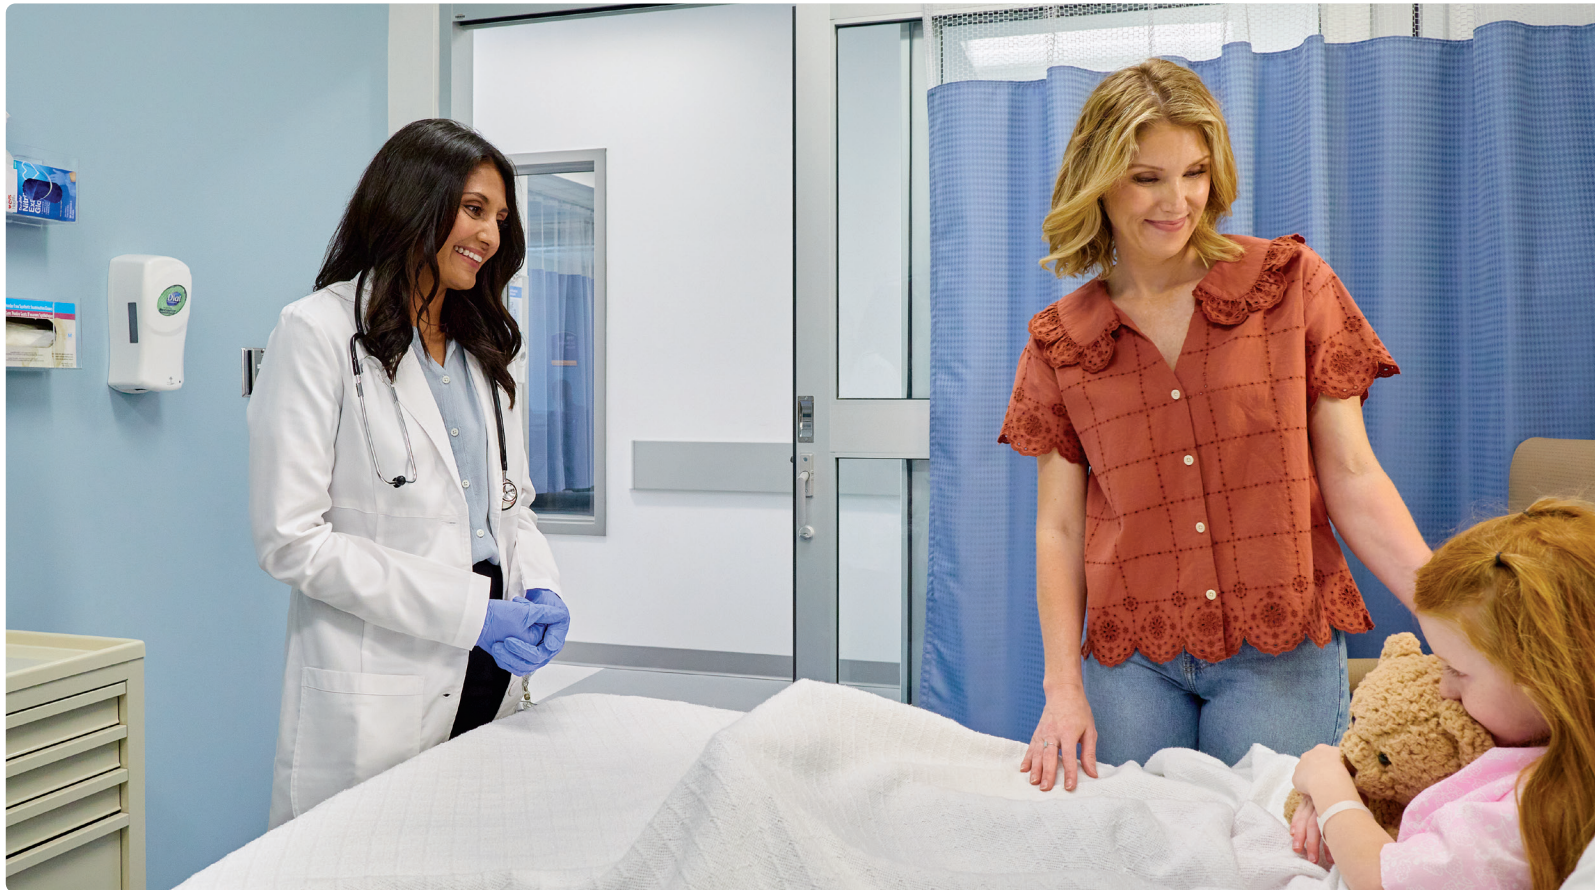

Stamford, Connecticut USA

Dial® has been a trusted household brand for over 75 years with a focus on antibacterial protection. Dial® hand soaps are tough on bacteria but gentle on skin. Our formulas are pH balanced, paraben-free, have improved biodegradability and are certified as cruelty free. Dial® is the #1 doctor recommended antibacterial hand soap brand and is not only offered through traditional décor pump packaging but also through proprietary Dial® dispensers.

Washing with soap and water is the best way to prevent the spread of C. diff from person to person.¹

Dial® Detail

Care for Every Situation

Developing and enforcing a hand hygiene plan in patient exam and emergency rooms is critical. Even though situations change, the importance of proper hand care does not. From hand sanitizers to antibacterial soaps, providing quality hand hygiene options is appropriate for any situation.

5 Steps To Hand Washing

1

Wet with clean, running water

2

Lather by rubbing hands together

3

Scrub for at least 30 seconds

4

Rinse with clean, running water

5

Dry with clean, disposable towel

Exam & Isolation Room

Care for Patients

While your staff should understand the importance of hand hygiene, many visitors may not. Concerned friends and family can unknowingly bring bacteria into their loved one's room. This can be dangerous to the patient as in some cases, their immune system is compromised causing them to be vulnerable. But providing easy-to-use, safe, and effective products can help make proper hand hygiene effortless.

In as little as 15 seconds, Dial® Professional antibacterial foaming soaps kill:

99.99% of the following found in hospital settings:

- Acinetobacter baumannii ATCC 19606
- Clostridium difficile (vegetative) ATCC 9689
- Enterococcus faecalis (VRE) ATCC 51299
- Escherichia coli ATCC 11229
- Escherichia coli O157:H7 ATCC 43888
- Klebsiella pneumonia ATCC 10031
- Klebsiella pneumonia ATCC BAA-1705
- Listeria monocytogenes ATCC 15313
- Pseudomonas aeruginosa ATCC 9027
- Salmonella enterica subsp. enterica ATCC 13076
- Shigella flexneri ATCC 700930
- Shigella sonnei ATCC 11060
- Streptococcus pneumoniae ATCC 6303
- Streptococcus pyogenes ATCC 14289

Care for Visitors

While patients look forward to seeing their loved ones, many of these visitors bring with them unwanted guests like harmful bacteria. It is important to stay a step ahead and focus on the well-being of both patients and visitors. Providing convenient, easy-to-use hand hygiene options can significantly help reduce the spread of harmful germs and bacteria found on common surfaces like doors, countertops, tables, elevators and chairs. Dial® Professional can help eliminate harmful bacteria before it can spread throughout the facility.

Alcohol-based hand sanitizers

are the preferred way to clean hands when they are not visibly dirty in healthcare facilities.⁴

Dial® Detail

Care for Staff

Like common areas, high-traffic work areas like the nurses' station can be an optimal location for the spread of harmful bacteria. Shared medical charts, pens, computers and other items can contain bacteria that could transfer from one staff member to another. Providing convenient, easy-to-use hand hygiene options and protocols, including washing or sanitizing hands before and after using gloves, can significantly help reduce the spread of harmful germs and bacteria.

Care for the Long-Term

When it comes to long-term healthcare and behavioral health, proper hand sanitation takes on more importance as the patient's home is also their exam room. Whether the healthcare professional is coming into the patient's home, or the patient resides in a long-term health facility, Dial® Professional has the soaps and sanitizers to help keep patients, staff and visitors safe from harmful bacteria that can be spread through the hands. Even more, stylish décor pumps help long-term residents feel at home while they are away from home.
