Leak Prevention and Increased Efficiency
Adhesive, Sealant and Functional Coating Solutions for Fluid Power

[Henkel logo] Excellence is our Passion
Solutions for Fluid Power

As a fluid power equipment manufacturer, you face demanding market requirements for increased durability, lower cost and greater energy efficiency. Henkel, the leading solution provider for adhesives, sealants and functional coatings, offers expertise throughout the value chain, as well as innovative solutions that provide maximum reliability and cost-effective production.

Your benefits using LOCTITE® adhesives and sealants instead of traditional fastening methods:

- Leak-free joints
- Lower cost, less complex joining methods
- Advanced materials for cleaner and more energy-efficient systems
- Integration of electronic parts
- Vibration damping solutions
- Worldwide product availability and support
- Good performance on a variety of substrates

See how LOCTITE® products can solve your design challenges.

Hydraulic Pump

Pneumatic Screw Compressor

To complete the product portfolio across the entire value chain, Henkel offers a comprehensive cleaning and protecting solution range to cover your industrial market needs:

- LOCTITE® cleaners for parts cleaning prior to bonding
- BONDERITE® cleaners to clean and protect parts during all phases of your manufacturing process
### Thread Sealing – Sealing Threaded Components

- Seal against aggressive fluids / high pressure
- Prevent corrosion
- Resist vibration, pressure impacts, bending and different thermal expansion

#### Solutions
- **LOCTITE® 577™**

### Potting – Encapsulating and Isolating

- Protect components against impact, vibration, thermal shocks and dust
- Prevent contamination and corrosion

#### Solutions
- **LOCTITE EA E-30CL™**
- **TECHNOMELT® PA/PO Series**

### General Bonding – Joining and Sealing Dissimilar Materials

- Fill gaps, allow wider tolerances
- Resist vibration and reduce noise

#### Solutions
- **LOCTITE® 4090™**
