

LOCTITE SOLVE

The AI-powered virtual adhesives platform for automotive design engineers.

Simulation-Ready Material Data Cards

Integrate AI-powered adhesive intelligence directly into digital design workflows with simulation-ready material data cards.

Rapid Physical Sampling

Bridge virtual engineering and real-world validation by turning AI-generated conceptual formulations into physical samples in as little as two weeks.

Key Benefits

- ✓ Make faster, more accurate design decisions before physical samples
- ✓ Reduce early testing and model calibration time
- ✓ Enable rapid “what-if” simulation studies
- ✓ Seamlessly transition from digital simulation to physical sampling

Key Applications

-  **E-Mobility**
-  **Automotive Electronics**
-  **Interior & Exterior**
