DETERMINING THE RIGHT SHADE

All shades are shown on the **ideal base for the shade**, indicated by the number in front of the dash, to deliver a true to swatch result:

- Identify natural base hair color, color depth, and texture to choose the right **IGORA VIBRANCE® Activator**
- Identify the white hair percentage on the re-growth to choose the right mixing ratio between **Natural** and **Fashion** shade
- Identify the color on the mid-lengths and ends (depth and tone direction) to choose the desired tone

IGORA VIBRANCE shades may appear darker during the development time. The shade depth is in line with the indicated number on the shade.

EXPERT TIP

CHOOSING THE RIGHT CONSISTENCY

The **IGORA VIBRANCE Activator System** allows you to choose between a Gel or soft Cream consistency.

- The **IGORA VIBRANCE Activator Gel 1.9% / 6 Vol.** contains a gel-ifying agent which creates a unique Gel consistency ideal for bottle applications like quick services at the basin.

- The **IGORA VIBRANCE Activator Lotions 1.9% / 6 Vol. and 4% / 13 Vol.** contain a special thickening agent, which transforms the liquid color into a cream consistency enabling precise, easy and fast application.

IGORA VIBRANCE is formulated with an easy 1:1 mixing ratio on all shades.

BREAK THE BRASS

STEP 1

After pre-lightening use shampoo & conditioner to create an even hair canvas before applying the IGORA VIBRANCE® Toner

with IGORA VIBRANCE® Activator Gel 1.9% / 6 Vol.

COLOR 1: IGORA VIBRANCE 9.5-1 + 0-00 (1:1)

COLOR 2: IGORA VIBRANCE 9-7 + 0-00 (1:1)

TIPS & TRICKS

To CUSTOMIZE THE COLOR RESULT choose complementary shades to be used in thin slices as follows:

- Same as target shade but lighter
- Strong fashion mix tone to break color and create fusion effect
