BEYOND BOND LIGHTENER

- Lifts 9+ levels in a single application
- Includes integrated DUALBOND technology that mends inner bonds and seals the outer cuticle
 - This technology leaves hair 28% smoother and 50% more manageable
 - Enhances color service deposition and longevity
- Application:
 - In foil
 - Double Processing
 - Global application with 20V or below for on scalp
- Mixing Ratio: 1:2 to 1:3
- Developer: 10V-30V
- Processing Time: 45-55 minutes It is not recommended to process under heat

BLUE POWDER LIGHTENER

- Lift up to 8 levels in a single application
- Blue base for neutralization during the lifting process for anti-yellowing effects
- Application:
 - Global application with 20V or below for on scalp
 - In foil
 - Balayage techniques
- Mixing Ratio: 1:2 to 1:3
- Developer: 10V-30V
- Processing Time: up to 45 minutes It is not recommended to process under heat

KENRACOLOR[®]

CLAY LIGHTENER

- Lift up to 7 levels in a single application
- Formulated with Kaolin Clay to create a cast and lock in moisture
- Application:
 - Balayage techniques
 - Off-scalp application
- Mixing Ratio: 1:2 to 1:3
- Developer: 10V-30V
- Processing Time: up to 45 minutes It is not recommended to process under heat

NO AMMONIA LIGHTENER

- Lift up to 8 levels in a single application
- Application:
 - In foil
 - On or off-scalp application
- Mixing Ratio: 1:1 to 1:3
- Developer: 10V-30V
- Processing Time: up to 45 minutes It is not recommended to process under heat

FREQUENTLY ASKED QUESTIONS

Q: Can the Ultra Lifts remove artificial hair color?A: No, the Ultra Lifts are not able to lift out artificial haircolor, only natural color.

Q: What is the base pigment of the Ultra Lifts?

A: The base pigment of the Ultra Lift coloring cremes is blue.

Q: What level can the Ultra Lifts be used on?

A: Ultra Lift coloring cremes are designed to be used on levels 6 and above. If used on darker levels, expect a warmer end result.

Q: What is a clay lightener?

A: A clay lightener is a lightening product formulated with a thick creamy consistency and when applied to the hair, it creates a 'cast' to prevent bleeding onto other sections of hair without using foils or plastic.

Q: Can I mix a booster into Clay Lightener to help neutralize warmth when lifting?A: We do not recommend mixing boosters into Clay Lightener, to neutralize warmth; we recommend following the service with Demi-permanent Color.
