YOUR STRAIT WAY TO SUPER STRAIGHT HAIR

ANALYSIS OF THE HAIR

Select the perfect STRAIT THERAPY Straightening Cream strength by first analysing the hair to check the density & porosity level.

HAIR CLEANSING

Cleanse the hair using BC Bonacure Deep Cleansing Shampoo and towel dry. Do not massage the scalp.

POROSITY BALANCING

Apply STRAIT THERAPY Protection Balancer to protect coloured and porous areas - gently blot dry the hair with a towel or tissue.

SECTIONING

Wear suitable gloves. Divide the hair into 4 equal sections. Apply the cream 1 cm away from the root to 5cm wide & 1cm deep sections starting at the nape.

EVEN DISTRIBUTION

Start at the neck. Ensure the cream is distributed and combed evenly through each section for perfect straight results.

DEVELOPMENT

When developing STRAIT THERAPY Straightening Cream always make sure that the hair lays in a completely straight position. Cover the hair with a plastic cap. For normal hair use additional heat.

RUBBER BAND TEST

Processing Time: 7 - 30minutes. Check the result taking a test strand. If you can stretch the hair approximately twice as much as normal, the process is finished. NOTE: Do not exceed the maximum processing time DO

DON'T

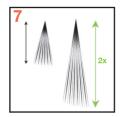

Always rinse with lukewarm water for a minimum of 5 - 8 minutes to guarantee the complete removal of the cream.

Apply STRAIT THERAPY Post Balm over the whole head and leave in for 1 minute (5 minutes on coloured hair). Rinse thoroughly.

IN-BETWEEN BLOW-DRYING

When blow-drying the hair prior to ironing & neutralising, ensure the hair is always dried completely straight while avoiding excess tension.

STRAIGHTENING To prevent any bends at the root area on the finished result, always make sure

that the straightening irons are held a 90 degree angle from the head.

Divide the hair into 4 sections and apply the STRAIT THERAPY Neutralizing Milk without adding tension. Use at least the same amount of Neutralizing Milk as Straightening Cream. Make sure that all the hair lays in a completely straight position during the neutralising process. Leave in for 10 - 15 minutes.

FINAL TREATMENT

Rinse out thoroughly and towel dry the hair.

For maximum gloss apply STRAIT THERAPY Post Balm and leave it in for up to 15 minutes. Rinse thoroughly. Blow dry the hair with a paddle brush without applying any tension or twist hair sections. Finish with a straightening iron for perfect results.

Follow manufacturers instructions and recommend that the client does not tie

DO

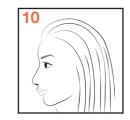

DON'T

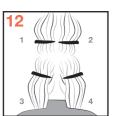

CUSTOMER ADVICE

back the hair or uses clips or washes their hair for a minimum of 72 hours after the straightening treatment.
