

# NON-CONDUCTIVE ADHESIVES (ACTIVE ALIGNMENT ADHESIVES)

## LOCTITE ABLESTIK NCA 01UV, 01UV LV 1-Step Cure Adhesive

**Climate:** Reduced carbon footprint / energy savings in the application phase

- Energy savings >30% during curing compared to standard dual cure (heat and UV)\*

**Safety:** Enhances safety in application

- REACH compliant
- Free of any reportable REACH Substances of Very High concern (SVHCs), antimony and substances classified as carcinogenic, mutagenic or reprotoxic (CMR)

### ADAS Active Alignment Adhesives

These revolutionary, high reliability adhesives are specially designed for high resolution ADAS cameras and LiDAR applications. The LOCTITE ABLESTIK NCA UV portfolio offers solutions with one-step, fast UV curing times and provide an automotive-grade quality for high reliability.

Loctite Ablestik NCA 01UV is highly reliable, using no CMR, SVHC nor antimony.
