PL® 510 Wood
Construction Adhesive

**Description:** Loctite® PL® 510 Wood construction adhesive is a premium quality adhesive specifically formulated for bonding all types of wood for interior or exterior construction projects. The formulation is low in odor and cleans up easily with water.

**Available As:**

</table>

**Features & Benefits:**
- Certified on Wet, Frozen and Treated Lumber
- Will Bridge Minor Gaps
- Low Odor, Easy Clean-Up
- Low VOC Content

**Recommended For:** Loctite PL 505 adheres to wet, frozen and treated lumber, plywood, OSB, particleboard, paneling, molding & trim, polystyrene panels and drywall.

**For Best Results:** Not recommended for the following applications:
- Underwater applications or permanent water immersion
- Exterior applications where rain or freezing is expected within 24 hours
- Use on mirrors and metals that will corrode
- Bonding two non-porous surfaces
- Polyethylene, polypropylene, nylon or Teflon®/ polytetrafluoroethylene (PTFE)
- Cement Board (Durock®)
- Composite decking

**Coverage:** For a 10 fl oz. (295 ml) cartridge:
- A 1/4” (6 mm) bead extrudes approximately 30.6 ft. (9.3 m)
- A 3/8” (9.5 mm) bead extrudes approximately 13.6 ft. (4.1 m)
**TECHNICAL DATA SHEET**

**Typical Uncured Physical Properties:**
- **Color:** Tan
- **Appearance:** Thick paste
- **Base:** Co-polymer latex
- **Odor:** Mild acrylic odor
- **Specific Gravity:** 1.224
- **Solids Content:** Approximately 70% by weight
- **pH:** 7.2 – 7.8
- **VOC Content:** 0.1% by weight
- **Shelf Life:** 18 months from date of manufacture (unopened)
- **Lot Code Explanation:**
  - **YY** = Last two digits of year of manufacture
  - **DDD** = Day of manufacture based on 365 days in a year
  - Example: 14061 = 61st day of 2014 = March 2, 2014

**Typical Application Properties:**
- **Application Temperature:** Apply and cure between 40°F (4°C) and 100°F (38°C)
- **Open Time:** 10 minutes* at 70°F and 50% relative humidity
- **Repositioning Time:** 15 minutes* at 70°F and 50% relative humidity
- **Cure Time:** 48 hours* at 70°F and 50% relative humidity
*Time is dependent on temperature, humidity, porosity of substrate and amount of adhesive applied

**Typical Cured Performance Properties:**
- **Color:** Tan
- **Cured Form:** Non-flammable solid
- **Service Temperature:** 10°F (-12°C) to 160°F (71°C)
- **Water Resistant:** Yes. Do not use outdoors if rain is expected within 24 hours.
- **Shear Strength:**
  - Dry Lumber: $407 \pm 50$ psi ($2.81 \pm 0.34$ N/mm²)
  - Wet Lumber: $380 \pm 22$ psi ($2.62 \pm 0.15$ N/mm²)
  - Frozen Lumber: $403 \pm 46$ psi ($2.78 \pm 0.32$ N/mm²)
  - Gap Filling: $402 \pm 21$ psi ($2.77 \pm 0.14$ N/mm²)
- **Specifications:**
  - Meets and exceeds APA AFG-01
  - Meets ASTM D 3498
  - Conforms to performance requirements of HUD-FHA Application per UMB 60a

**Directions:**
- **Tools Typically Required:** Utility knife, caulking gun and tool to puncture inner seal of cartridge.
- **Safety Precautions:** Wear gloves.
- **Preparation:**
  - The temperature of the adhesive, the surfaces and the working area must be above 40°F (4°C) and below 100°F (38°C). For best performance, apply adhesive at 70°F (21°C). Ensure surfaces to be bonded are clean, dry, structurally sound and free of dust, grease, oil, snow, ice, standing water or other contaminants. To increase adhesion, sand glossy surfaces to a dull finish.
- **Application:**
  - General Construction Use:
    - Pre-fit all materials prior to applying product. Cut off tip of cartridge at a 45° angle to desired bead size. Puncture inside seal of cartridge. Using a caulking gun, apply adhesive to one of the surfaces to be bonded. Press materials firmly together.
Repositioning time is approximately 10 minutes. If work is delayed, remove excess adhesive and reapply.

Paneling Instructions:
Cut and pre-fit panels. Apply ¼” bead near the panel edges and every 6” in-field. Press panel firmly into place. Panels must be installed within 10 minutes of adhesive application. Apply firm pressure across the entire panel surface to ensure good contact with the adhesive. Fasten or brace the panel until the adhesive is dry (minimum of 24 hours). The cure time will vary depending on the temperature, airflow and porosity of the material being bonded.

Clean-up:
Clean tools and uncured adhesive residue immediately with warm water and soap. Cured adhesive may be carefully cut away with a sharp-edged tool.

Storage & Disposal:
DAMAGED BY FREEZING. Store in a cool, dry location at room temperature. Take unwanted product to an approved household hazardous waste transfer facility. Hardened material may be disposed of with trash.

Label Precautions:
CAUTION! Contains ethylene glycol and crystalline silica. May cause skin, eye and respiratory irritation. Avoid contact with eyes and skin. Use with adequate ventilation. Do not swallow. FIRST AID: If swallowed do not induce vomiting, call a physician or Poison Control center immediately. For eye contact flush with water for 15 minutes, call a physician. For skin contact wash thoroughly with soap and water. If overcome by vapors, get fresh air. KEEP OUT OF THE REACH OF CHILDREN.

WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

Refer to the Safety Data Sheet (SDS) for further information.

Disclaimer:
The information and recommendations contained herein are based on our research and are believed to be accurate, but no warranty, express or implied, is made or should be inferred. Purchasers should test the products to determine acceptable quality and suitability for their own intended use. Nothing contained herein shall be construed to imply the nonexistence of any relevant patents or to constitute a permission, inducement or recommendation to practice any invention covered by any patent, without authority from the owner of the patent.

Trusted Performance. Proven Results.
For over 50 years, Loctite Brand adhesives and sealants have taken on the toughest jobs. Used in race cars, airplanes, and even in the space-shuttle, Loctite provides solutions for the most demanding industrial, professional and consumer applications. Loctite gives you not the specialization, power and performance to not only get your job done, but to get it done right.
