The Safety Data Sheet is required by the REACH Regulation explicitly only for substances and mixtures (Article 31). The duty to provide information on substances in articles (Article 33) is valid only if the article contains a substance that fulfills the criteria of Article 57 of the REACH Regulation in concentration higher than 0,1% (w/w). These substances are also known as substances of very high concern (SVHC).

Since the TEROSON window sealing strips and pre-compressed foam tapes do not contain any SVHC in concentrations higher than 0,1%, it is not required to prepare a SDS for them.

Don't hesitate to contact us if you have any additional questions.
