

Make a plastic bottle piggy bank

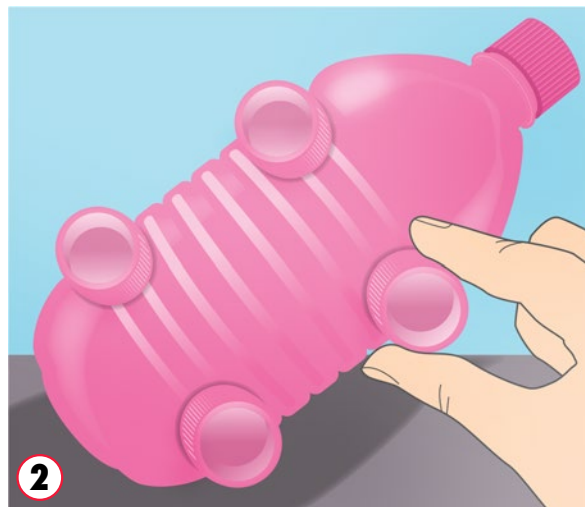

You will need:

- 1 x clean plastic bottle (it needs to be a bottle with a nozzle wide enough to fit all coin variations)
- 4 x bottle tops
- Sharp scissors
- Piece of pink card (or white card painted pink)
- Pritt Stick
- 1 x pink pipe cleaner
- Pair of wiggly eyes
- Craft knife
- Pink paint
- Black marker pen

All cutting with sharp objects should be completed by an adult

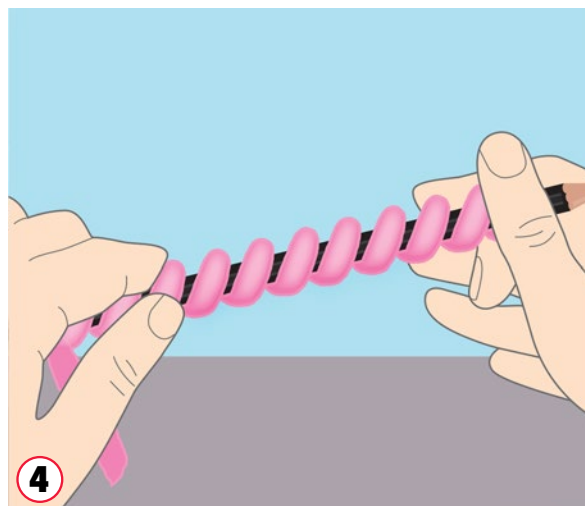

1
Paint the plastic bottle and bottle caps using pink paint and leave to one side to dry

2
Once dried, glue the bottle caps to the side of your bottle, ensuring these are evenly spaced. These caps will form the feet of the pig so need to be positioned to ensure it can stand up

3
Next, help your child by cutting a coin slot in the top of the pig's back using a craft knife. Ensure this slot is big enough for all coin types.

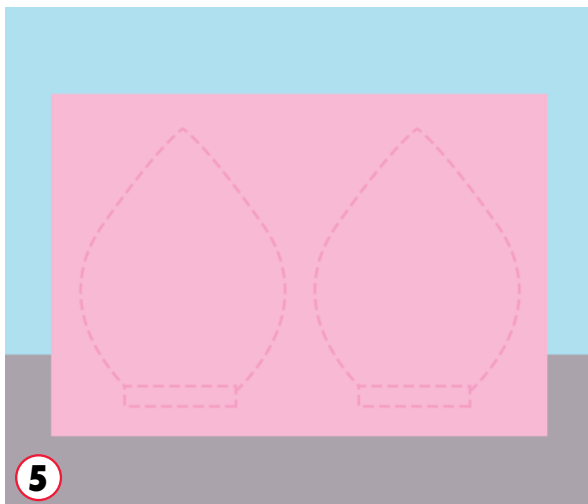

4
Cut a small hole in base of the bottle for the tail. To make a curly tail for the pig coil a pipe cleaner around a pencil before feeding one end through the hole

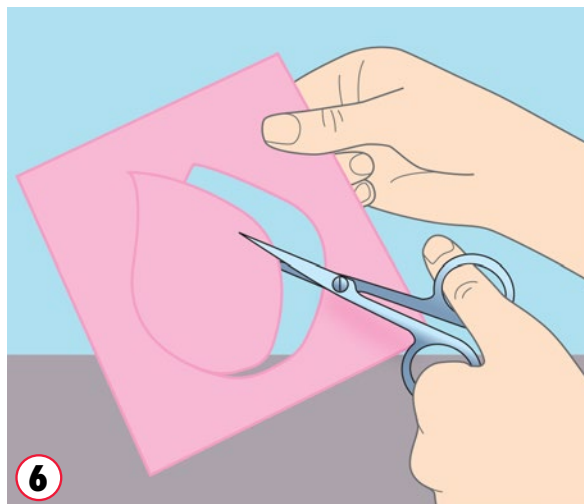

Parent notes

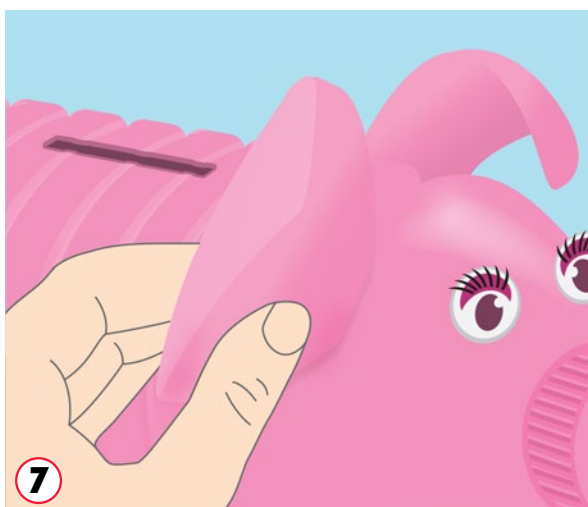

Make a plastic bottle piggy bank (cont.)

5 Use the template above to create two ear shapes on a piece of card

6 Then carefully cut them out

7 Finally, glue on the ears and wiggly eyes before drawing two nostrils onto the bottle cap on the head of your pig to create the snout

8 Now your piggy bank is ready to start collecting your spare coins

Top tip:

You can create a farmyard of different animal banks using the same instructions but varying the colour and stick-on details
