Farebné odliene uvedené vo vzorkovníku sa vzťahujú k akrylátovým, silikátovým, silikónovým, silikátovo-silikónovým, elastomérovým a siliko-elastomérovým omietkam a akrylátovým, silikátovým a silikónovým náterom Ceresit. Berte prosím na vedomie, že sa farby v originálnej podobe môžu líšiť od prezentovaných farieb. Elektronická a tlačná podoba vzorkovníka nie je považovaná za plne spoľahlivú prezentáciu. Odporúčame preto vybrané farby porovnať so skutočnými vzorkovníkmi.

*V prípade silikátového náteru CT 54 nie sú tieto farebné odliene k dispozícii.

☀ Index odrazu svetla/HBW (LRV)

HBW (LRV) - Koefficient odrazu svetla (percento viditeľného žiarenia odrazeného na povrchu). LRV pokrýva rozsah viditeľného svetla.

TSR - Celková odrazivosť slnečnej energie (percento slnečného žiarenia odrazeného od povrchu v celom rozsahu). Tento faktor sa týka svetelných vln v ultrafialovom, viditeľnom a infračervenom rozsahu.

Na zaistenie dlhjej životnosti fasády a zabráneniu nadmernému zahrievaniu povrchu sa odporúča používať vrchné nátery (omietky a nátery) u ETICS s hodnotou odrazu svetla HBW \geq 25 a celkovou hodnotou odrazu slnečných lúčov TSR \geq 25. Ak je jeden z faktorov nižší ako 25, kontaktujte obchodno-technické oddelenie a nájdete riešenie na mieru.

Harmonické a vyvážené

Pre tých, ktorí majú radi farby harmonicky splyvajúce s okolím. Nájdete tu všetky odtiene zelenej, béžovej a bielej.

Farebné odtiene uvedené vo vzorkovníku sa vzťahujú k akrylátovým, silikátovým, silikónovým, silikátovo-silikónovým, elastomérovým a siliko-elastomérovým omietkam a akrylátovým, silikátovým a silikónovým náterom Ceresit. Berte prosím na vedomie, že sa farby v originálnej podobe môžu líšiť od prezentovaných farieb. Elektronická a tlačná podoba vzorkovníka nie je považovaná za plne spoľahlivú prezentáciu. Odporúčame preto vybrané farby porovnať so skutočnými vzorkovníkmi.

*V prípade silikátového náteru CT 54 nie sú tieto farebné odtiene k dispozícii.

☀ Index odrazu svetla/HBW (LRV)

HBW (LRV) - Koefficient odrazu svetla (percento viditeľného žiarenia odrazeného na povrchu). LRV pokrýva rozsah viditeľného svetla.

TSR - Celková odrazivosť slnečnej energie (percento slnečného žiarenia odrazeného od povrchu v celom rozsahu). Tento faktor sa týka svetelných vln v ultrafialovom, viditeľnom a infračervenom rozsahu.

Na zaistenie dlhjej životnosti fasády a zabráneniu nadmernému zahrievaniu povrchu sa odporúča používať vrchné nátery (omietky a nátery) u ETICS s hodnotou odrazu svetla HBW \geq 25 a celkovou hodnotou odrazu slnečných lúčov TSR \geq 25. Ak je jeden z faktorov nižší ako 25, kontaktujte obchodno-technické oddelenie a nájdete riešenie na mieru.

Romantické a jemné

Nájdete tu špinavé béžové,
rozmazané šedé a záhadné
hnedé farby.

Farebné odtiene uvedené vo vzorkovníku sa vzťahujú k akrylátovým, silikátovým, silikónovým, silikátovo-silikónovým, elastomérovým a siliko-elastomérovým omietkam a akrylátovým, silikátovým a silikónovým náterom Ceresit. Berte prosím na vedomie, že sa farby v originálnej podobe môžu líšiť od prezentovaných farieb. Elektronická a tlačенá podoba vzorkovníka nie je považovaná za plne spoľahlivú prezentáciu. Odporúčame preto vybrané farby porovnať so skutočnými vzorkovníkmi.

*V prípade silikátového náteru CT 54 nie sú tieto farebné odtiene k dispozícii.

 Index odrazu svetla/HBW (LRV)

HBW (LRV) - Koefficient odrazu svetla (percento viditeľného žiarenia odrazeného na povrchu). LRV pokrýva rozsah viditeľného svetla.

TSR - Celková odrazivosť slnečnej energie (percento slnečného žiarenia odrazeného od povrchu v celom rozsahu). Tento faktor sa týka svetelných vln v ultrafialovom, viditeľnom a infračervenom rozsahu.

Na zaistenie dlhjej životnosti fasády a zabráneniu nadmernému zahrievaniu povrchu sa odporúča používať vrchné nátery (omietky a nátery) u ETICS s hodnotou odrazu svetla HBW \geq 25 a celkovou hodnotou odrazu slnečných lúčov TSR \geq 25. Ak je jeden z faktorov nižší ako 25, kontaktujte obchodno-technické oddelenie a nájdete riešenie na mieru.

Energické a pozitívne

Nájdete tu celú škálu energických farieb, od žltých a červených cez oranžové a hnedé až po fascinujúce modré odtiene.

Farebné odtiene uvedené vo vzorkovníku sa vzťahujú k akrylátovým, silikátovým, silikónovým, silikátovo-silikónovým, elastomérovým a siliko-elastomérovým omietkam a akrylátovým, silikátovým a silikónovým náterom Ceresit. Berte prosím na vedomie, že sa farby v originálnej podobe môžu líšiť od prezentovaných farieb. Elektronická a tlačná podoba vzorkovníka nie je považovaná za plne spoľahlivú prezentáciu. Odporúčame preto vybrané farby porovnať so skutočnými vzorkovníkmi.

*V prípade silikátového náteru CT 54 nie sú tieto farebné odtiene k dispozícii.

 Index odrazu svetla/HBW (LRV)

HBW (LRV) - Koefficient odrazu svetla (percento viditeľného žiarenia odrazeného na povrchu). LRV pokrýva rozsah viditeľného svetla.

TSR - Celková odrazivosť slnečnej energie (percento slnečného žiarenia odrazeného od povrchu v celom rozsahu). Tento faktor sa týka svetelných vln v ultrafialovom, viditeľnom a infračervenom rozsahu.

Na zaistenie dlhjej životnosti fasády a zabráneniu nadmernému zahrievaniu povrchu sa odporúča používať vrchné nátery (omietky a nátery) u ETICS s hodnotou odrazu svetla HBW \geq 25 a celkovou hodnotou odrazu slnečných lúčov TSR \geq 25. Ak je jeden z faktorov nižší ako 25, kontaktujte obchodno-technické oddelenie a nájdete riešenie na mieru.

Intenzívne a výrazné

Ceresit

Paleta obsahuje 36 odvážnych a intenzívnych farieb, inšpirovaných prírodnou krásou drahokamov: od ušľachtilej žltej až po smaragdovo zelenú a diamantovo šedú.
